Defining and Targeting  
Autoimmune Pre-Disease

# INTERNATIONAL CONGRESS ON AUTOIMMUNE PRE-DISEASE 2024

SEPTEMBER 16 & 17

We are excited to invite **researchers**, **clinicians**, and **professionals** in the field of autoimmune diseases to participate in the upcoming International Congress on Autoimmune Pre-Disease! Join us in unraveling the intricate journey from health to autoimmunity at the Autoimmune Pre-Disease Congress.

Delve into the impact of metabolism, stress, microbiota, aging, and drugs on this transition, as well as the pivotal role of real-world data in understanding autoimmune pre-disease. We will **focus on systemic rheumatic diseases, pemphigus, and pemphigoid diseases** while warmly welcoming submissions related to other autoimmune conditions.

Engage in stimulating discussions and networking opportunities amidst the poster sessions and a scenic river boat cruise along the enchanting river Wakenitz, along the medieval town of Lübeck.

Don't miss this opportunity to contribute to cutting-edge research and forge new connections in the field of autoimmunity. We look forward to your participation!

## Venue

Audimax | University of Lübeck  
Ratzeburger Allee 160 | 23560 Lübeck |  
Germany

## Registration

Please register via the conference website  
[www.grk2633.uni-luebeck.de/grk2633/conference-registration.html](http://www.grk2633.uni-luebeck.de/grk2633/conference-registration.html)

## Abstracts

Max 250 words, excluding title, authors, and affiliations, until August 1st, 2024  
(Please use the template provided on the conference website)
